RIPPA 20 YEARS

# R910

RIPPA's advantages in power, efficiency, versatility and value are driven by our robust features. Our compact articulated design uses less horsepower to do most jobs-that means less surface impact and lower operating costs.

- ✔ Excellent weight to lift ratio
- ✔ increases productivity, saving time and manpower
- ✔ Minimal surface impact
- ✔ Articulated, compact design
- ✔ Low operating cost
- ✔ Easy to operate
- ✔ 360° operator visibility
- ✔ Hundreds of attachments

# ENERGY SAVING AND EFFICIENT

## High efficiency

Low fuel consumption and excellent productivity help you complete your tasks more economically.

## Highly efficient performance

Tailor-made to meet job site requirements, tasks range from material transport and loading to general construction and stockpiling.

## Easy maintenance

Our electrical and hydraulic maintenance center has additional critical maintenance functions that enable quick, simple, and efficient machine maintenance and on-site component replacement.

## ECONOMICAL SAVINGS

# MAINSTREAM POWER IN THE INDUSTRY, GOOD ECONOMICS

The engine is equipped with a turbocharger, meets Euro V standards, is powerful and efficient. Equipped with P, S, E multi-state switches, which can be reasonably selected according to the working conditions, which can reasonably improve efficiency and reduce fuel consumption.

H-shaped new appearance, beautiful and elegant; Compact and flexible, one machine can be used for multiple purposes, with quick return on investment to avoid equipment being idle.

# THE FRAME HAS STRONG LOAD-BEARING CAPACITY

Tires are more solid and durable and can be used in earth and stone construction of highways, railways, buildings, hydropower, ports, mines and other construction projects.

Reinforced front and rear frames: The key stress-bearing parts are strengthened in design, with strong bearing capacity; stress concentration is eliminated, load distribution is reasonable, and the service life is long.

# REASONABLE LAYOUT AND CONVENIENT MAINTENANCE

The operating space in the cab is large, the vibration damping and sealing are good, and the comfort is high; the new instrument panel has eye-catching colors, strong legibility, and is easy to understand.

The horizontal radiator has small medium flow resistance and good heat dissipation effect.

The hydraulic oil tank refueling port and torque converter oil filter are externally located for easy maintenance;

The comfortable and spacious cab is equipped with heating and cooling air conditioning and safety seats to ensure driving experience and safety.

The multi-functional display instrument can intuitively display various data of the machine, and the operator can monitor the health status of the machine through it.

The large-opening hood can be opened upward 90°, providing a large space for maintenance; the air filter and fuel filter are centrally arranged.

# SPECIFICATION

Model	R910
Dimensions(L*W*H)	4500X1650X2500mm
Rated bucket capacity(m3)	0.5
Rated load(kg)	1000
Lifting height(mm)	3500
Max. dump height (mm)	2200
Min. turning radius(mm)	2150
Max. turning radius(mm)	3850
Max. speed(km/h)	20
Engine Model	CHANGCHAI ZN390Q (Euro 5)
Engine Rated power(kw)	25KW
Weight	2500KG
Working pressure	16Mpa
Steering angle	35°
Standard tires	31*15.5-15
Optional tires	400/60-15.5
Fuel tank capacity	60L
